Betreff: Re: Class rule

Can you please insert a request to change the class rule C.8.2.a , changing the position of the measurement point on the fin as follow?

Hull datum point to intersection of hull and fin ~~trailing~~ leading edge, around hull on centreline ~~3482~~ 3xxx mm ~~3494~~ 3xxx mm

Hull datum point to intersection of fin ~~trailing~~ leading edge and top of keel bulb, straight line ~~3784~~ 3xxxx mm ~~3823~~ 3xxx mm

Underside of hull in a straight line to top of keel bulb at the ~~trailing~~ leading edge of the keel ~~4195~~ 1xxx mm ~~4245~~ 1xxx mm

Explanation: if you want move the position of the fin more than normal , you can work on the aft edge of the fin. Not possible work onto the leading edge, because of the keel cutter slot.

Thank you
